Filed 2 Patents in the past 2 years.

I acquire good Communication and Interpersonal skills.

TRAININGS

Python
Greater Noida Institute Of Technology, Greater Noida
Feb 2024 - May 2024

PROJECTS

AI Based: Events & Festival Planner by using NLP
Dec 2023 - Dec 2023

As the name suggests this project can plan a whole event including the venue, budget, availability, guest lists etc. By using a bit of AI in the event planner; it is now very efficient to just plan the events without any human support. The AI can handle mostly everything.
NLP will sort list the emails of the user and can come handy to send invitations to some selected people who are likely to come to the event. We are also planning to add a chat box by using NLP that will help out users with every solution to their queries.
